Dewan to whom the papers were submitted with draft to the extension, observed that it would be better to obtain the approval of the Secy: D.P.W. for such extensions before they were sanctioned, as they related to professional matters. Please see his order of 10.5.08.

V

When the papers were submitted to the late 1st Cr with the Chief Engineer's opinion obtained as directed in the above order of the Dewan, the 1st Cr gave his opinion in the following terms

"In my humble opinion the Board must be allowed a free hand, & the Chief Engineer & Secy D.P.W. has no voice in such matters. The Chairman is an experienced D.P.W. Officer & does not think it was ever intended that his proposals should be subjected to scrutiny and approval by the Chief Engineer. By all means let us conduct the latter whenever necessary but he can be nothing more than an adviser. . . ."

I. I am of opinion that it is absolutely neces -sary that all plans and estimates i-e projects in connection with the improvements and drainage should be submitted to the Chief Engineer for scrutiny and approval before being submitted to Government for sanction

But the question of the proper form of procedure to be laid down for the conduct of the operations now being carried out under the Trust Board is not such a simple one as may at first sight appear to be the case as the scheme of improvements to Mysore involve large outlay on the acquisition of property and houses, with which the P W D need have nothing whatever to do, and there would be no doubt other minor details which it would be the duty of the Sanitary Department to deal with and not the P W D

I consider that the proper procedure would be (1) that all new or Revised projects should be first of all sub- -mitted to the Central Sanitary Board Here they would undergo scrutiny in so far as the general scope of the scheme is concerned, and all the Sanitary aspects of the proposals would be consider- -ed and settled But in so far as the projects which have already been sanctioned and under which work is now in progress these have already received the approval of the Sanitary Commissioner and they need not be sent up again unless it is proposed to modify the proposals, in which latter case the revised projects should be sent up to the Sanitary Board

marginal note overleaf

sheet.

Serial No

(2) The project after receiving the approval of the Sanitary Board would be submitted to the Chief Engineer for scrutiny in respect to the Engineering features of the project, and also for modifications if required in accordance with any suggestions made by the Sanitary Board, checking of rates, &c If the Chief Engineer is of opinion that any suggestions or modifications made by the Sanitary Board are for any reasons undesirable, such questions should be settled in Un-official Notes, and the project re-vised accordingly

(3) The project after final revision would then be submitted by the Chief Engineer to Government for sanction

II I wish to lay particular stress upon the point that after the project has been sanctioned by Government the interference of the Sanitary Board in matters of purely Engineering details of con-struction or operation is most inadvisable

III So far as I am aware all the projects hitherto sanctioned by Government for the improve-ments of Mysore City, have already received the approval of the Sanitary Commissioner before they were submitted to Government for sanction, and I am of opinion that it is unnecessary to now submit these projects to the Sanitary Board for approval It is proposed to appoint the Health Officer and the Deputy Sanitary Commissioner Members of the Trust Board, and they can therefore make any suggestions from a purely Sanitary point of view to that Board for consideration, and if dissatisfied with the decision of the Trust Board, the questions at issue

As he was on the Committee upon both in GO No 4164-79/47 dated 18th Sept 1902 to devise a Scheme for the sanitary improvements of the Mysore City) & the Schemes already sanctioned were based on the recommendations arrived at by that Committee

GPB 50 000—17 7-4/

Serial No.

can then be submitted to Government through the Central Sanitary Board for orders.

IV. I would point out that there is a great difference between " placing the operations of the Trust Board under the Chief Engineer "; and " placing the works of the Trust Board under the Chief Engineer".

I consider that all administrative operations such as the acquiring of property and houses, serving of notices &c, should be left entirely under the control of the Trust Board: and that only the works under the Executive Engineer should be placed under the orders of the Chief Engineer.

V. There will then exist the following different authorities:-

1. Deputy Commissioner { (1) Municipality- President-- Deputy Commissioner
(2) Trust Board- Chairman- Deputy Commissioner

2. Sanitary Commissioner - President- Central Sanitary Board

3. The Chief Engineer- Who will have under his control only the works being carried out under the Executive Engineer; and also the maintenance and operation of the water supply to the City

In regard to the duties devolving on these 3 separate authorities,

I (1) The Municipality- Will continue to work as at present, and as works under the Trust Board are com-pleted they will be handed over to the Municipality for maintenance.

(2) Trust Board - At the present rate of progress on the works now being carried out for the Improve-ments &c. in Mysore it is impossible to complete the

Serial No

the scheme for many years to come, and I am of opinion that such a Board, Representative of the Local Authorities (City Municipality &c) and Sanitary and Engineering Authorities should continue to be entrusted with the operations, which are even at present, and will in future for many years to come be, on too large a scale to be entrusted to the Municipality

2 The Sanitary Commissioner and Central Sanitary Board- As I said before, the projects already sanctioned by Government for the Improvements of the City having already received the approval of the Sanitary Commissioner, I agree with the Trust Board in thinking that it is unnecessary to submit these again to the newly constituted Central Sanitary Board for scrutiny before execution, Work on 1 & 2 and portions of Nos 3 & 5 drainage areas and also the drainage of Nazarabad and Idga and Chattanhalli and other extensions have been completed, and until the works already sanctioned for Nos 3, 4 & 5 drainage areas have been completed works on those estimates already sanctioned may proceed But any new or revised projects should be submitted by the Trust Board to the Central Sanitary Board for approval, and after its approval these projects should be sent to the Chief Engineer for scrutiny and check The Sanitary Board should after that have ~~no more~~ to do with the works other than make proposals from a sanitary point of view as to any modifications &c which it considers desirable to bring forward at any time

sheet.

GPB -50 000—17-3-37

Serial No.

3. The Chief Engineer.- In so far as the carry--ing out of the works in progress is concerned the Chief Engineer may have control, and under his orders there will be the Executive Engineer and his staff As the Executive Engineer (Mr.D'Cruz) will necessarily have to continue, I think, to work under the Trust Board in respect to the de--molishing of houses acquired, and be also under the orders of the Chief Engineer in respect to the drainage works under construction, I think the simplest plan would be for the Board to draw out a programme of operations as I believe they do at present, based on the grant annually allotted by Government, under the several heads of the estimate such as

1. Compensation
2. Expenditure on demolition of houses and opening out lanes &c and removal of debris.
3 Construction works.

I think 1 & 2 should still be under the control of the Trust Board, as I can see no object in transferring such duty to the Chief Engineer, and only 3 be under the direct control of the Chief Engineer.

VI The last point requiring consideration is that of accounts and audit.

I think that it would only complicate matters to have more than one set of accounts under the Trust Board. and I consider that a separate set of accounts for works carried out under the orders of the Chief Engineer are unnecessary, and that the

Serial No.

the Chief Engineer's position in respect to such works should be only that of a " Consulting Engineer".

Arrangements should however be made for the proper audit- annually or ~~once~~ biennially, of the accounts , stock taking, &c and for this, proposals may be formulated in the Financial Department

act from the Proceedings of the 2/0 Meeting of the Council of His Highness the Maharaja, held at Bangalore on the 10th Aug 1908.

IV. Subject.-(Clause viii of Schedule).

Placing the operations of the Mysore City Trust Board under the Chief Engineer, and requiring schemes of improvement to be submitted by the Board through the Sanitary Commissioner

OPINION.

The Council is of opinion that the proposals made by the Chief Engineer in his unofficial Note dated 27th July 1908 are suitable, and may be approved.

F

Extract

(Sd) P. Madhava Rao
Dewan of Mysore

Submitted to His Highness

In his letter No. 3164 dated 25th February 1908, the Sanitary Commissioner requested that orders might be issued directing that schemes for sanitary improvements to be undertaken by the Mysore City Improvement Trust Board and other similar bodies shoul pass through the Sanitary Commissioner and the Central Sanitary Board, if necessary, in accordance with the instructions contained in Government order No. 1078-92 San 93-06-8 dated the 10th August 1907 The opinion of the Trust Board having been called for in the matter, the Board has resolved "that the schemes of the Trust Board be submitted to Government direct as heretofore and that the Government may, if it so pleases them, refer the same to the Sanitary Commissioner for his opinion" In submitting the resolution, the Chairman states that all Sanitary Improvement Schemes are discussed and passed by the Trust Board, of which the Mysore District Medical and Sanitary Officer is at present a member, that the Government have recently ordered that the Trust Board should be reconstituted allowing seats to the Deputy Sanitary Commissioner and the Health Officer, Mysore City, and that "when this is done, necessity will no longer exist for the sanitary schemes to be submitted through the Central Sanitary Board as proposed by the Sanitary Commissioner"

The first Councillor then suggested that question might be considered whether the Trust Board works might not be formally placed under the Chief Engineer in order that they might have the advant-

professional scrutiny before they are put in hand, and the P. W. D. audit thereafter. The Chief Engineer was thereupon consulted and he has given his opinion in his un-official No. 149 dated 25th July 1908 at pages 8 to 18 of the office notes. Briefly the Chief Engineer's opinion is -

(1) that projects hitherto sanctioned by Government for the improvement of the Mysore City having already received the approval of the Sanitary Commissioner who was on the Committee appointed by Government in 1902, it is unnecessary to submit them again for the approval of the Central Sanitary Board,

(2) that all new or revised projects sent up by the Trust Board should, in the first instance be approved by the Central Sanitary Board and afterwards scrutinised and cheked by the Chief Engineer in respect of their Engineering features, and then submitted to Government for sanction,

(3) that after the project has been sanctioned by Government, the Sanitary Board should have nothing to do with the works other than make proposals from a sanitary point of view as to any modifications which it considers desirable to bring forward at any time, and

(4) that all administrative operations such as acquisition of property and service of notices should be left entirely under the control of the Trust Board, the Chief Engineer having control over only the works carried out by the Executive Engineer

The question was consi[illegible]

and the Council is of opinion that the proposals made by the Chief Engineer in his un-official note referred to above are suitable and may be approved.

his may be sanctioned.

City of Mysore and other similar bodies should pass through the Sanitary Commissioner and the Central Sanitary Board, if necessary, in accordance with the instructions contained in G. O. No 1378-92 San 93-06-8 dated the 16th August 1907. The Sanitary Board ~~of~~ having been consulted ~~by~~ in the matter, the Board ~~has~~ ~~expressed~~ my opinion that the Schemes of the Municipal Board should be submitted to Govt direct as heretofore and that Govt ~~should~~, if they so please, refer the same to the Sanitary Commissioner for his opinion. In submitting the resolution, the Chairman stated that all sanitary improvement Schemes are discussed and passed by the Board of which the Mysore District Medical and Sanitary Officer is at present a member, that the Govt have ~~approved~~ accepted the Board

n. he should be recommended as to allowing seats to the Deputy Sanitary Commissioner and the Medical Officer, Improvement and that when the loan is no longer necessity will no longer exist for the Sanitary Schemes to be submitted through the Central Sanitary Board as proposed by the Sanitary Commissioner.

2 The Govt then considered whether the Boards' works might not be placed under the Chief Engineer in order that they might have the advantage of professional scrutiny before they are put in hand, and the P.W. Department and consulted the Chief Engineer in the matter. The Chief Engineer has given his opinion in his confidential note dated the 27th July 1908, which the Chief Engineer's opinion is summed up as follows.

(i) The projects hitherto sanctioned by Government for the improvement of the Improve

Proceedings of the Government of His Highness the Maharaja of Mysore

READ—

Letter No. 3164, dated the 25th February 1908, from the Sanitary Commissioner with the Government of His Highness the Maharaja of Mysore, regarding the submission of schemes for sanitary improvements undertaken by the Board of Trustees for the improvement of the City of Mysore and other local bodies to him or to the Central Sanitary Board.

2 Letter No. 709, dated the 4th May 1908, from the Chairman of the Board of Trustees for the improvement of the City of Mysore, submitting his and the Board's opinion in the matter

3 Note dated 27th July 1908 by the Chief Engineer of Mysore, giving his opinion on the question of placing the works of the Board of Trustees under him

No 3311-5—Mis. 440-07-5, DATED BANGALORE, 29TH SEPTEMBER 1908.

ORDER THEREON —The Sanitary Commissioner, in his letter of the 25th February 1908, read above, requested that orders might be issued directing that schemes for sanitary improvements to be undertaken by the Board of Trustees for the improvement of the City of Mysore and other similar bodies should pass through the Sanitary Commissioner and the Central Sanitary Board, if necessary, in accordance with the instructions contained in Government Proceedings No 1378-92—San 93-06-8, dated the 10th August 1907 The Board of Trustees being consulted in the matter were of opinion that schemes of the Trust Board should be submitted to Government direct as heretofore and that Government might if it so please them, refer the same to the Sanitary Commissioner for his opinion In submitting this resolution, the Chairman stated that all sanitary improvement schemes are discussed and passed by the Board of which the Mysore District Medical and Sanitary Officer is at present a member, that the Government have recently ordered that the Board of Trustees should be reconstituted so as to allow seats to the Deputy Sanitary Commissioner and Health Officer, Mysore City, and that when this is done, the necessity will no longer exist for the sanitary schemes to be submitted through the Central Sanitary Board as proposed by the Sanitary Commissioner

2 The Government then considered whether the Board's works might not be placed under the Chief Engineer in order that they might have the advantage of professional scrutiny before they are put in hand, and the Public Works Department audit thereafter and consulted the Chief Engineer in the matter The Chief Engineer has given his opinion in his note dated the 27th July 1908, which is briefly as follows —

(i) That projects hitherto sanctioned by Government for the improvement of the Mysore City having already received the approval of the Sanitary Commissioner who was on the Committee appointed by Government in their Proceedings No 4168-79—L F 36-02, dated the 18th September 1902, it is unnecessary to submit them again for the approval of the Central Sanitary Board,

(ii) That all new or revised projects sent up by the Board of Trustees should, in the first instance, be approved by the Central Sanitary Board and afterwards scrutinized and checked by the Chief Engineer in respect of their engineering features, and then submitted to Government for sanction,

(iii) That after a project has been sanctioned by Government the Sanitary Board should have nothing to do with the works other than make proposals from a sanitary point of view as to any modifications which it considers desirable to bring forward at any time, and

(iv) All subsidiary executive operations such as acquisition of property and use of metal should be left entirely under the control of the Board of Trustees, the Chief Engineer having control over only such as are carried out by Executive Engineers of the Board.
